How Do I Use Hotlinks?

Once you get the feel of the Internet, you look up the Web addresses that fit your current needs. You can do this in most cases by state or by listing. Enter the address into your Web browser and click. That's all there is to it. Always remember to have a notebook and pen by your side to write down pertinent information gleaned from the site. Or cut and paste the information to your notepad or Word document for future reference.
